

Polycom® WebCommander™

Scheduling, monitoring, and managing
MGC™ conferences

Benefits

Ready whenever you are – Start an on-demand meeting immediately or schedule a future conference

You're in control – Manage an active meeting or view upcoming schedules through a single login window

Full conference support – Schedule and manage any type of conference – Voice, Video or Unified

Increase productivity – Save regular meetings as templates. Save time by launching conferences, simply select the required template

Utilize powerful administrator tools – Multiple MCU support and monitoring screen for Polycom WebOffice™

Security – Encrypted login and password, administrators set specific profile authorization rights and SQL authentication support

Now you can control all aspects of setting up and running conferences on Polycom MGC products.

Polycom WebCommander improves productivity by making multipoint conferencing easy for everyone in your organization. Through a Web browser, users access Polycom WebCommander to quickly create and initiate conferences. Whether a meeting is starting immediately or in the future, Polycom WebCommander automatically selects the necessary resources. In addition, Microsoft® Outlook® can be used to create appointment details and send email notifications to participants.

By connecting to the MGC, screen updates are made in real time, including changing screen layouts, adjusting audio volume, connecting new participants, and more. The environment can be customized with graphics, languages, logos, and color schemes. To maintain system security, registered users need a login and password to access Polycom WebCommander.

The single-platform choice to access the power of Polycom unified collaborative communications solutions.

With the greatest breadth and depth of integrated video, voice, and Web solutions, only Polycom delivers the ultimate communications experience. Our market-leading conferencing and collaboration technologies, supported by world-class service, enable people and organizations to maximize their effectiveness and productivity. Add to that the most experience and proven best-practices in the industry, and it's clear why Polycom has become the smart choice for organizations seeking a strategic advantage in a real-time world.

Connect. Any Way You Want.

WebCommander packages

The various WebCommander packages provide users with the precise capabilities they need for controlling multiple MCUs and gateways across diverse networks. The administrator has full control of assigning specific rights and privileges to different user groups within an enterprise. Access to users is specified by the parameters in the user defined profile

WebCommander Professional

The WebCommander Professional combines Meeting Director and Meeting Scheduler, allowing full conference management and scheduling capabilities. Access to individual functions is based on the user's defined profile.

WebCommander Meeting Director

Meeting Director provides users with the means to monitor and manage their own conferences. Conference management functions and the depth of information displayed are based on the authorization rights assigned to a user's profile.

- View conference and participant connection status
- Adjust audio volume of participants
- Initiate/terminate conference
- Connect/disconnect participants
- Add participants to conference
- Change video layouts
- Mute participant voice and video
- Extend conference duration
- Lock conference

WebCommander Meeting Scheduler

Meeting Scheduler provides access to scheduling conferences in addition to creating and modifying conference databases.

- Schedule conferences
- Send email notifications to participants
- Email administrators when conferences are scheduled
- Create and manage database of predefined conference templates
- Create and manage database of predefined participants
- Auto email notification on schedule changes

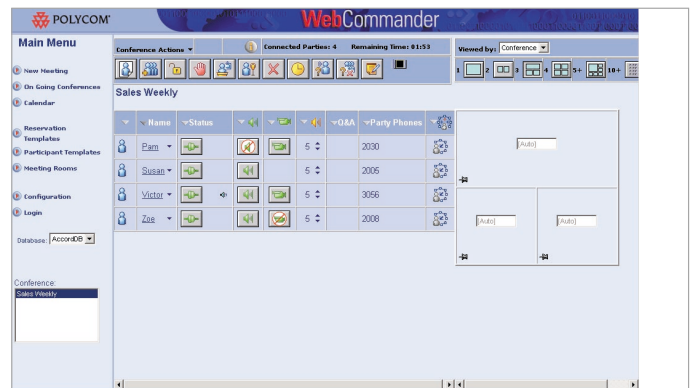

MGC Personal Scheduler (included with Meeting Scheduler)

The MGC Personal Scheduler package enables full video and voice conference scheduling support for Microsoft® Outlook®. MGC Personal Scheduler is a plug-in application. Users may schedule conferences using Outlook's drag & drop scheduling features.

- New Appointment
- Select multiple MCUs
- Select number of participants
- Modify appointment parameters
- Select WebOffice to combine Web collaboration address

With all the packages you receive:

- WebCommander Profile Manager
- Profile Manager is a utility that allows a system administrator to set user profiles in WebCommander.
- WebCommander Gateway Monitor
- Gateway Monitor is a utility that allows a system administrator to monitor gateway sessions in WebCommander.
